

Establishing the most effective systems to meet competing demands—open, welcoming facilities versus overt security deterring criminals — whilst getting the best value for money, is a difficult task. Capital Eye can assist as we have been involved in the **design, specifying and project management of security** and security systems installation, as independent advisors, for over 10 years. We have a strong record of working with government ministries, on behalf of development banks and agencies e.g. The World Bank and EU, with police and other justice services, with local and regional government and many types of private organisations to help them secure their people and premises; specifying security systems and procedures which work and are delivered on time, to budget.

We and our professional staff are currently working with several schools and colleges and have considerable practical experience in this area.

Security Review / Projects undertaken for:

Bloomsbury Publishing plc  
Cadbury Schweppes plc
